

WELCOME TO Skärpt

Smart Warehouse Solutions Division

ABOUT US

MISSION

To provide innovative systems and products to optimize productivity and enhance safety in warehouses. Our solutions empower businesses to achieve operational excellence while minimizing risks.

VISION

To transform the industry with intelligent solutions, leveraging automation, cloud connectivity, and data-driven insights, while innovating relentlessly and committing to our clients' success.

Our Products

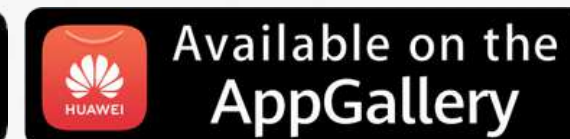

Skärpt **W**

Skärpt
HUB

How Skärpt W Platform Works?

Sensors

Send measures to the gateway

Connectivity

Gateway Collects, saves data & sends it to the Skärpt Platform

Data Processing

Making data useful, and meaningful

User Interface

Access from anywhere via any device

Features

Notification alerts **Email - SMS - Push**

An alert rules engine, which allows you to set conditions on which you will be notified.

Facility layout /Map

Maximizing efficient and effective processes to achieve organizational goals through facility layout.

Warehouse Control

Control your units and devices in any warehouse.

Automatic Reports

Select sensor(s), pick time & date, then generate any specified report content and type including 21 CFR Reporting.

Charts & Diagrams

Draw charts and diagram for each sensor

Why Skärpt **W**

Efficiency and Cost-Savings: Streamline operations through automated processes.

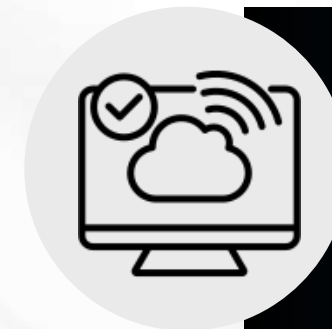

Integration: Seamlessly integrates with your existing business processes and IT systems.

Real-time Data Access: Enables faster decision-making and proactive management.

Remote Monitoring & Control: Track and control your devices from anywhere, at any time.

Security: Robust security measures for data confidentiality, integrity, and system availability.

Advanced Data Analysis: To process data and extract valuable insights, enhancing strategic business decisions.

ESCAPE THE LIMITATIONS & ENHANCE YOUR CONTROL

1. Robotic process automation (RPA) software deploys and manages robots emulating human actions in digital systems.
2. Optical Character Recognition (OCR) technology can identify and interpret visual information “Like Sensors Flashing” and convert it into data.
3. The Mini PC or a server sends this data to the Skräpt W platform.

ESCAPE THE LIMITATIONS & ENHANCE YOUR CONTROL

Why SKMAN?

- **Automates Routine Tasks:** Efficiently execute repetitive, rules-based tasks; this helps to save time and improve overall operational efficiency.
- **Reduces Errors:** Automating processes reduces errors, resulting in high-quality and consistent output.
- **Real-Time Data Conversion:** Making data analysis more efficient and effective.
- **Integration with Skrapt W Platform:** The data generated and collected by SKMAN will be sent to the Skrapt W platform for further analysis, to generate actionable insights from large datasets.
- **Improves Business Agility:** By reducing time spent on routine tasks and enabling faster decision-making through accurate data analysis.
- **Cost-Efficiency:** In the long term, SKMAN is a cost-effective solution as it reduces labor costs and increases productivity by accomplishing tasks at a faster rate.

- Security

Skärpt
HUB

Your Smart Warehouse Brain

All-In-One, Robust industrial and commercial devices Integration

Why Skärpt Hub?

Superior Compatibility: With 1000+ devices and offers limitless integration within your system.

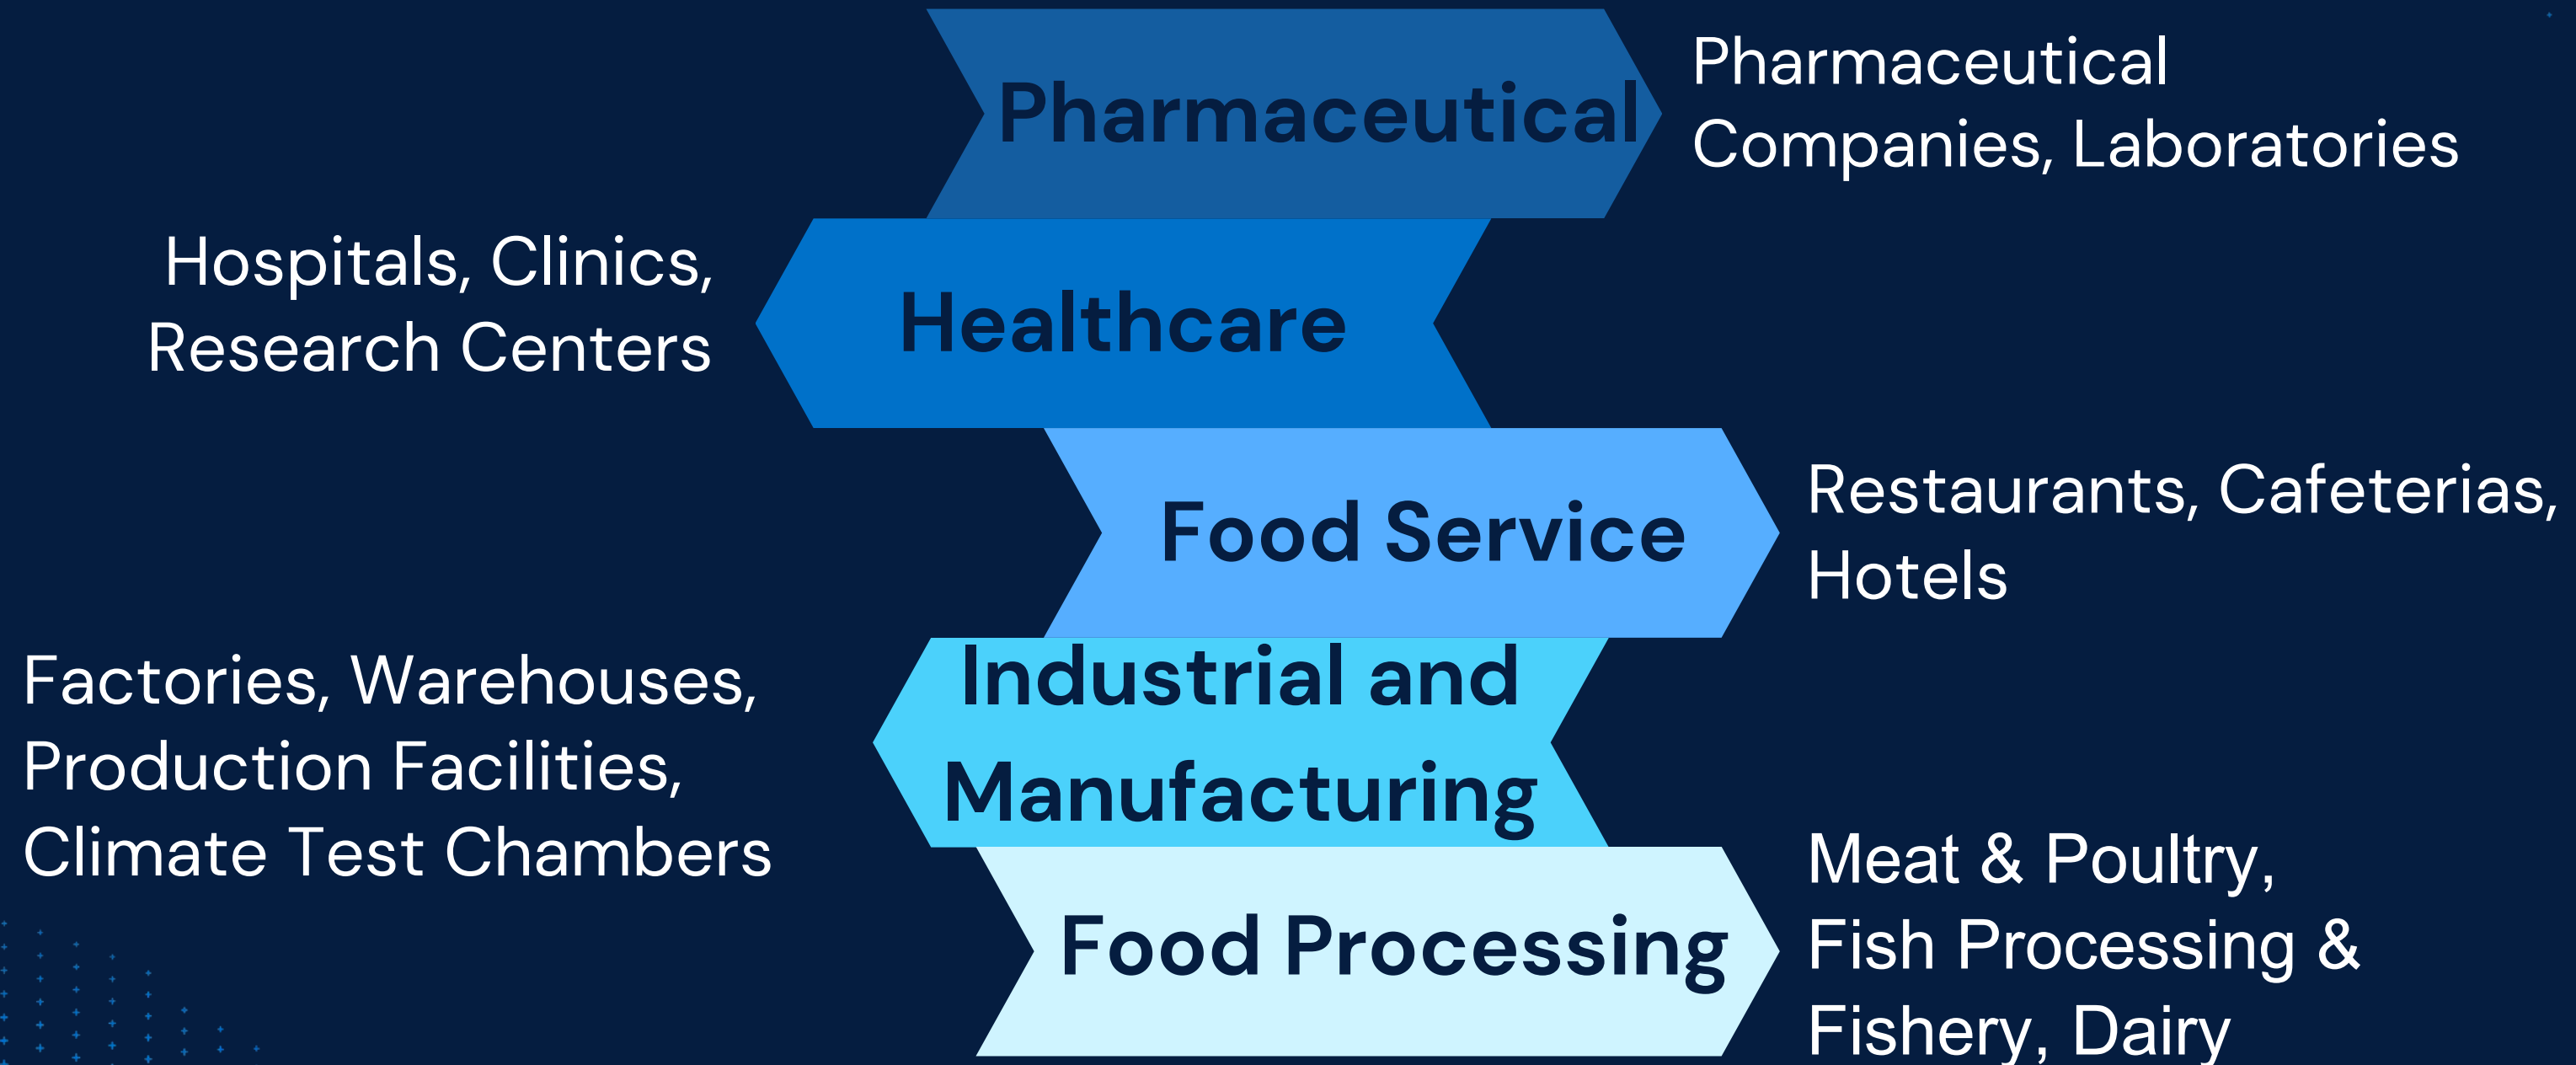

Incredible Scalability: Flexibility to integrate more devices as your needs grow and technology evolves.

Secure System: All your devices communicate securely within one hub server.

QUALITY COMMITMENT

Reliability

We are committed to providing reliable services that meet the highest industry standards.

Durability

Our services are built to last, with durable materials and components that ensure long-term performance and reliability.

Quality Control

We have stringent quality control measures in place to ensure that every service is of the highest quality.

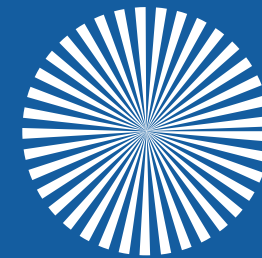

Customer Satisfaction

We prioritize customer satisfaction to exceed their expectations.
